Projects

Face Recognition Attendance System

The Face Recognition Attendance System aims to automate attendance management by implementing robust face detection algorithms, storing records securely, and providing an intuitive user interface, revolutionizing traditional tracking methods with advanced facial recognition technology.

CV Builder

A CV builder web application is a versatile tool for creating professional resumes in various formats and designs, catering to various job industries and personal preferences. It also allows for PDF conversion for electronic submission.

Inventory Management System

An inventory management system helps store owners track sales, purchases, stock levels, expired products, saving time, and enhancing efficiency and profitability.

Declaration

I hereby declare that information as mentioned above is correct up to my knowledge and I bear the responsibility for the correctness of particulars.
